CSOMS Summer Meeting 2017

Saturday, July 22, 2017

7:30 AM – 8:30 AM:

Mark C. Lucas, DDS, MS

Mark is a Clinical Assistant Professor at the University of Colorado School of Dental Medicine in the Division of Periodontics and serves as the Vice President of Research & Development for Snoasis Medical. He is a graduate of the University of Colorado School of Dental Medicine and completed an internship in Oral & Maxillofacial Surgery at the University of Alabama Birmingham and a Periodontal Surgery residency at the University of Texas Health Sciences Center San Antonio. He is a Diplomate of the American Board of Periodontology.

Title: Rise of Placental Tissue Products: Implications in Dentistry & Medicine

- Review the history and evolution of placental tissue use in dentistry & medicine.
- Review the background science of placental tissue graft materials.
- Discuss the competitive landscape for placental tissue materials in dentistry and new areas of application.

8:35 AM – 9:35 AM:

Jerry D. Mancuso, DDS

Jerry maintains an Oral & Maxillofacial Surgery private practice in Silicon Valley with a focus on facial trauma, bone grafting, dental implants, cleft lip and palate repair and extractions. He attended Loyola Marymount University in Los Angeles and received his DDS degree from the University of the Pacific in 1992. He was commissioned as an officer in the US Navy and completed a one year residency at the National Naval Center in Bethesda, Maryland. Upon completion of his overseas Naval service, he enrolled in an Oral & Maxillofacial Surgery residency program at The Hospital of St. Raphael/Yale-New Haven Hospital and Children's Hospital. He became board certified by the American Board of Oral & Maxillofacial Surgery in 2002.

Title: Clinical Applications of Amnion-Chorion Allografts in Oral & Maxillofacial Surgery

- Review various clinical applications for dehydrated amnion-chorion allograft in oral and maxillofacial surgery.

9:35 AM – 10:15 AM: Break – Visit with Exhibitors

10:15 AM – 11:15 AM:

Dustin J. Hopkin, DDS

Dustin attended dental school at the University of Iowa prior to completion of his Oral & Maxillofacial residency training at Indiana University. He is Board Certified by the American Board of Oral & Maxillofacial Surgery and practices in Salt Lake City, Utah providing care in areas including orthognathic surgery, exodontia, dental implants and bone grafting, oral pathology, TMJ disorders and oral and facial trauma. He was one of the first surgeons to employ micronized dehydrated amnion-chorion injectable allograft in the treatment of TMJ disorders.

Title: Advances in the Treatment of Temporomandibular Joint Disorders

- Review of treatment options for TMJ osteoarthritis and associated disorders.
- Review case series data utilizing injectable micronized amnion-chorion allograft in the treatment of TMJ disorders.

11:15 AM – 11:30 AM: Previous Speakers Group Question / Answer

Sunday, July 23, 2017

7:30 AM – 11:30 AM: with mid-morning break

Daniel R. Cullum, DDS

Dan completed his DDS with distinction at the University of Alberta, Canada and a general practice residency and specialty training in Oral & Maxillofacial Surgery at Westchester Medical Center, New York. He is a diplomate of the American Board of Oral & Maxillofacial Surgery and is on faculty as a Visiting Lecturer at both Loma Linda University and UCLA, Departments of Oral & Maxillofacial Surgery and is Past-Chair, Department of Surgery, at Kootenai Medical Center. He speaks internationally and has written numerous articles, textbook chapters and a new textbook titled "Minimally Invasive Dental Implant Surgery."

Title: Minimally Invasive Dental Implant Surgery: Making the Most with the Least

- Discuss minimally invasive implant techniques – where, when and why? A presentation of dynamic navigational surgery, immediate implant placement (esthetic and molar sites), ridge expansion and crestal sinus elevation will be completed.
- CBCT diagnosis and treatment planning will demonstrate classic and advanced techniques based on the residual bone, technology available and surgeon preference.

- Participants will gain an understanding to master advanced skills with minimally invasive techniques for predictable patient centered outcomes.
